

**CATAPULT C-11 ELECTRICAL SYSTEM, DEVICE 2G22****TRAINING CATEGORY:**

AVIATION

ORIGINATING AGENCY:

DCNO/AIR

SECURITY CLASSIFICATION:

Device 2G22 is unclassified.

FUNCTIONAL DESCRIPTION:

Catapult C-11 Electrical System, Device 2G22, is designed to assist in the instruction of Catapult and Arresting Gear Officers and enlisted operational personnel relative to the purpose, operation and controls of the Catapult C-11 Electrical System. The device provides a visual presentation which will enable the instructor to illustrate his lecture by showing the relationships of the components and their simulated utilization. The device will also provide a means of testing trainee understanding of the system and present the trainee with an opportunity to practice on the

system. Proper use of the presentation will furnish adequate instruction in the details of these systems so as to qualify the trainees for advanced training on the actual equipment. The device does not, however, provide training in the maintenance and repair of the catapult electrical system.

POWER REQUIREMENTS:

115 VAC, 60 cyc, single phase.

REFERENCE PUBLICATIONS:

NAVEXOS P-1879: Instructor's Guide for the Catapult C-11 Electrical System.

CONTRACT IDENTIFICATION:

Manufactured by Gardner Displays Company, Pittsburgh, PA under NAVTRASYSCEN Contract No. N61339-232.

LOCAL STOCK NUMBER:

6910-LL-C00-1318
